

Feb, 2019

### Purpose of the Organizational Assessment:

Sustained improvement activities require attention to the organizational Quality Management Program (QMP), in which structures, processes and functions support measurement and improvement activities. Development, implementation and spread of sustainable quality improvement (QI) throughout an HIV program require an organizational commitment to quality management. Organizational infrastructure is fundamental to QI success, and involves a receptive organization, sustained leadership, staff training and support, time for teams to meet, and data systems for tracking outcomes. This structure supports quality initiatives that apply robust process improvement including: reliable measurement, root cause analysis and finding solutions for the most important causes identified.

This assessment identifies all of the important elements associated with a sustainable QMP. Scores from 0 to 5 are defined to identify gaps in the QMP and to set program priorities for improvement. The scoring structure measures program performance in specific domains along the spectrum of improvement implementation. When assigning a score of 0-5 for individual components, select the whole number that most accurately reflects organizational achievement in that area. If there is any uncertainty in assessing whether performance is closer to the statement in the next higher or next lower range, choose the lower score. Scoring is designed so that all items in a score must be satisfied to reach any one score for a component. Applied annually, this assessment will help a program evaluate its progress and guide the development of goals and objectives.

The OA is implemented in two ways: 1) by an expert QI consultant or 2) as a self evaluation. The results are ideally used to develop a workplan for each element with specific action steps and timelines guiding the planning process to focus on priorities, setting direction and assuring that resources are allocated for the QMP. Whether performed by a QI consultant or applied as a self evaluation, key leadership and staff should be involved in the assessment process to ensure that all key stakeholders have an opportunity to provide important information related to the scoring.

Results of the OA should be communicated to internal key stakeholders, leadership and staff. Engagement of program leadership and staff is critical to ensure buy-in across the program, and essential for translating results into improvement practice.

### A. Quality Management

GOAL: To assess the HIV program infrastructure to support a systematic process with identified leadership, accountability and dedicated resources.

Three components form the backbone of a strong sustainable quality program: Leadership, Quality Planning and a Quality Committee.

### Leadership

Senior Leadership personnel are defined by each organization since titles and roles vary among organizations. Clinical HIV programs should include a clinical leader (medical director, senior nurse) and an administrative leader (program coordinator, clinic manager, administrative director). Larger programs may include additional leadership positions. There may be other informal leaders in the organization that support quality activities, but these are not included in this section.

Leaders establish a unity of purpose and direction for the organization and work to engage all personnel, consumers and external stakeholders in meeting organizational goals and objectives, this includes motivation that promotes shared responsibility and accountability with a focus on teamwork and individual performance. HIV program leaders should prioritize quality goals and improvement projects for the year and establish accountability for performance at all organizational levels. The benefits of strong leadership include clear communication of goals and objectives, where evaluation, alignment and implementation of activities are fully integrated.

Evidence of leadership support and engagement includes establishment of clear goals and objectives, communication of program/organizational vision, creating and sustaining shared values, and providing resources for implementation.

### **Quality Committee**

A quality committee drives implementation of the quality plan and provides high-level comprehensive oversight of the quality program. This involves reviewing performance measures, developing workplans, chartering project teams, and overseeing progress. Teams should be multidisciplinary and include a client when feasible. Consumer representation on the committee should be part of a formal engagement process where consumer feedback is solicited and integrated into the decision making process. The committee should have regularly scheduled meetings, meeting notes to be distributed throughout the program and a committee chair or chairs.

### **Quality Plan**

Quality improvement planning occurs with initial program implementation and annually thereafter. A quality management plan documents programmatic structure and annual quality team goals. The quality plan should serve as a roadmap to guide improvement efforts, and include a corresponding workplan to track activities, monitor progress and signify achievement of milestones.

quality of
vel 0)

Planning and		Leaders are:
initiation		□ Not fully involved in improvement efforts, quality meetings, supporting provision of resources
	1	for QI activities.
		□ Primarily focused on external requirements and supporting compliance with regulations.
		□ Inconsistent in use of data to identify opportunities for improvement.

Beginning Implementation Implementation	2	Leaders are:       Not engaged optimally.         Engaged in quality of care with focus on use of data to identify opportunities for improvement.         Somewhat involved in improvement efforts.         Somewhat involved in quality meetings.         Supporting some resources for QI activities.         Leaders are:         Providing routine leadership to support the quality management program.         Providing routine and consistent allocation of staff or staff time for QI (depending on facility size).         Actively engaged in QI planning and evaluation.         Actively managing/leading quality meetings.         Clearly communicating quality goals and objectives to all staff.         Recognizing and supporting staff involved in QI.         Routinely reviewing performance measures and patient outcomes to inform program priorities and data use for improvement.         Attentive to national health care trends/priorities that pertain to the program.	
Progress toward systematic approach to quality 4	4	<ul> <li>Leaders are:</li> <li>X□ Supporting development of a culture of QI across the program, including provision of resources for staff participation in QI learning opportunities, seminars, professional conferences, QI story boards for distribution and drafting of scholarship, etc.</li> <li>X□ Supporting prioritization of quality goals based on data, and critical areas of care are addressed in coordination with broader strategic goals for HIV care.</li> <li>□ Promoting patient-centered care and consumer involvement through the Quality Management Program.</li> <li>X□ Routinely engaged in QI planning and evaluation.</li> <li>X□ Routinely providing input and feedback to QI teams.</li> </ul>	
Full systematic approach to quality management in place	5	<ul> <li>Leaders are:</li> <li>□ Actively engaged in the implementation and shaping of a culture of QI across the program, including provision of resources for staff participation in QI learning opportunities, seminars, professional conferences, QI story boards for distribution and drafting of scholarship, etc.</li> <li>□ Encouraging open communication through routine team meetings and dedicated time for staff feedback.</li> <li>□ Routinely and consistently engaged in QI planning and evaluation.</li> </ul>	nmented [RS1]:
Comments: Leaders through the QM p		<ul> <li>Routinely and consistently providing input and feedback to QI teams.</li> <li>Encouraging staff innovation through QI awards or incentives.</li> <li>Directly linking QI activities back to institutional strategic plans and initiatives.</li> </ul>	
A.2. To what exten the quality of HIV Getting Started		<ul> <li>as the HIV program have an effective quality committee to oversee, guide, assess, and improve ices?</li> <li>              A Quality Committee has not yet been developed or formalized or is not currently meeting regularly to provide effective oversight for the quality program.      </li> </ul>	
Planning and initiation	1	The quality committee:         Image: Image	

Page 4 of 22

Beginning		The quality committee:
Implementation	2	□Has plans to hold regular meetings, but meetings may not occur regularly and/or do not focus on
	2	performance data.
		□ Has been formalized, representing most institutional disciplines.
		□ Has identified roles and responsibilities for participating individuals
Implementation		The quality committee:
		$X\square$ Is formally established and led by a program director, medical director or senior clinician.
3	3	X□ Has implemented a structured process to review data for improvement.
	3	$X\square$ Has defined roles and responsibilities as codified in the quality plan.
		$X\square$ Reviews performance data regularly, including staff and consumer satisfaction, if available.
		X Discusses QI progress and redirects teams as appropriate
Progress toward		The quality committee:
systematic		X□ Is formally established and led by a program director, medical director or senior clinician
approach to		specifically tasked with active oversight of the work of the quality program with established
quality		annual meeting dates.
	4	X□ Represents all disciplines.
	4	X Has established a performance review process to regularly evaluate clinical measures and
		respond to results as appropriate, including staff and consumer satisfaction.
		Communicates with non-members through distribution of minutes and discussion in regular
		staff meetings. Shares at HIV Advisory council
		□ Actively utilizes a workplan to closely monitor progress of quality activities and team projects.
		□ Provides progress reports to the organization-wide quality program.
Full systematic		The quality committee:
approach to		□ Is a formal entity led by a senior clinician or administrator and, where appropriate, is linked to
quality		organizational Quality Committees through common members.
management in		□ Has established a systematic performance review process, including clinical, consumer
place		satisfaction and operational measures to identify annual goals.
	5	□ Is responsive to changes in treatment guidelines and external/national priorities (NAHS, HAB,
		CMS), which are considered in development of indicators and choosing improvement
		initiatives.
		□ Has fully engaged senior leadership and they lead discussions during committee meetings.
		Effectively communicates activities, annual goals performance results and progress on
		improvement initiatives to all stakeholders, including staff, consumers and board members.
Comments: While	we a	re a solid 3, we are working on integrating the elements in # 4. We are represented by multiple
disciplines and an	re loo	king at adding a Nurse Case Manager to our QM Committee, who has already participated in our
Retention to Care	e PDS	SA. We are also in discussion about adding a Clinic Nurse or MA to our committee. We are also
		at staff satisfaction surveys annually. We need to strengthen our communication with non-members.
		eting agendas include QM, but we need to improve the integration of QM with clinic staff. We are
		minutes and activities on the agency intranet, which could reach a broader spectrum of non-
		to use our work plan to monitor our quality activities. We have begun to participate in the clinic QM
1 0	0	en them an overview of our RW Part C QM program. We are sending minutes to Senior
		nic and are needing to clarify what the expectation of providing progress reports to the organization-
		is. Would posting activities, sending minutes to clinic leadership, and providing updates at clinic
CQI meetings sur	ffice?	
		es the HIV program have a comprehensive quality plan that is actively utilized to oversee
quality improvem	ent a	

Each score r	equi	res completion of all items in that level and all lower levels (except any items in level 0)
Getting Started	0	☐ A quality plan, including elements necessary to guide the administration of a quality program, has not been developed.

Organizational Quality Assessment Tool

Page 5 of 22

Planning and initiation		The quality plan: Is written with some of the essential components necessary to direct an effective quality
mination	1	program (see level 3).
		□ May be written for the parent organization or for the network, but plans specific to the HIV
		program or for the network has not yet been developed.
Beginning		The quality plan:
Implementation		$X \square$ Is written for the HIV program, and contains some of the essential components (see level 3).
Implementation	2	$X \square$ is written for the first program, and contains some of the essential components (see level 5). $X \square$ Is under review for approval (if required by organization) by senior leadership, and includes
2		steps for implementation.
Implementation		The quality plan:
Implementation		$X \square$ Reflects an effective HIV-specific quality program with all of the essential QI components
		including:
		annual goals and objectives,
		<ul> <li>roles, responsibilities,</li> </ul>
		<ul> <li>logistics,</li> </ul>
	3	<ul> <li>performance measurement and review processes,</li> </ul>
	5	<ul> <li>QI methodology,</li> </ul>
		communication strategy,
		• consumer involvement,
		program evaluation procedure
		□ Is routinely communicated to program staff.
		X Includes an annual workplan/timeline outlining key activities of the quality program and
		improvement initiatives
Progress toward		The quality plan:
systematic		Has been implemented and regularly used by the quality committee to direct the quality program.
approach to		Includes annual goals identified on the basis of internal performance measures and external
quality	4	requirements through engagement of the quality committee and staff. Work plan is modified as needed to achieve annual goals.
	+	Is routinely communicated to stakeholders, including staff, consumers, board members and the
		parent organizations, if appropriate.
		Is evaluated annually by the quality committee to ensure that the needs of all stakeholders are
		met and that changes in the healthcare and regulatory environment are assessed to ensure that
		the program meets the changing needs of the HIV patient.
Full systematic		The quality plan:
approach to		□ Is written, implemented and regularly utilized by the quality committee to direct the quality
quality		program and includes all necessary components (see level 3).
management in		□ Includes regularly updated annual goals that were identified by the quality committee using
place	5	data on internal performance measures and external requirements through engagement of the
-	5	quality committee and staff.
		□ Includes a workplan/timeline outlining key activities in place and is routinely and consistently
		used to track progress on performance measures and improvement initiatives, and modified as
		needed to achieve annual goals.
		□ Is aligned with that of the parent organization and/or all network sites, as appropriate.
		re implemented many of the components of the QI components that are stated in # 3, approval of
our plan is still pendin	ng to	date, and has not been routinely communicated to program staff.
I		

### B. Workforce Engagement in the HIV quality program

GOAL: To assess awareness, interest and engagement of staff in quality improvement activities.

Staff engagement in quality activities at all organizational levels is central to QI success. This includes development and promotion of staff knowledge around organizational systems and processes to build sustainable quality management programs, such as internal management processes, operational barriers, patient interaction, and successful strategies and barriers to QI implementation.

Ongoing training and retraining in QI methodology and practical skills reinforces knowledge and the building of workforce expertise around QI. Training and retraining of staff can be accomplished through formal sessions provided internally by the organization or externally through legitimate training resources such as the National Quality Center (NQC). Training should be designed to build capacity and capability of the workforce based on regular assessment and reassessment of staff knowledge and skills. It can be conducted at different times and in different ways including a general overview during new staff orientations; integrated into regular staff meetings; can occur onsite or offsite; and sponsored by the organization or external credible organization. As staff progress along the continuum of QI sophistication, improvement is slowly integrated into clinic practice, enhancing staff engagement in the process. Immediate access to improve patient outcomes.

As QI becomes part of the institutional culture and team work progresses, staff embraces their respective roles and responsibilities, acquiring a sense of ownership and deeper involvement in improvement work.

B.1. To what extent are physicians and staff routinely engaged in quality improvement activities and provided tr	aining
to enhance knowledge, skills and methodology needed to fully implement QI work on an ongoing basis?	

Each score r	equi	res completion of all items in that level and all lower levels (except any items in level 0)
Getting Started	0	□ All staff (clinical and non-clinical) are not routinely engaged in QI activities and are not provided training to enhance skills, knowledge, theory or methodology or encouragement to identify opportunities for improvement and develop effective solutions.
Planning and initiation	1	Engagement of core staff in QI (clinical and non-clinical):  I is under development and includes training in QI methods and opportunities to attend meetings where QI projects are discussed.
Beginning Implementation 2	2	Engagement of core staff in QI (clinical and non-clinical): X Is underway and some staff have been trained in QI methodology. X Includes QI meetings attended by some designated staff.
Implementation	3	<ul> <li>Engagement of core staff in QI (clinical and non-clinical) includes:</li> <li>X□ Attendance in at least one training in QI methodology. Staff members are generally aware of Program QI activities (quality plan/priorities).</li> <li>X□ Involvement in QI projects, project selection and participation in a QI committee.</li> <li>X□ QI project development, where projects are discussed and reviewed during staff meetings.</li> <li>□ Defined roles and responsibilities related to QI. Physicians and staff are aware of the quality plan and priorities for improvement.</li> <li>□ A formal process for regularly recognizing staff performance in QI via performance appraisals, public recognition during staff meetings, etc.</li> </ul>
Progress toward systematic approach to quality	4	<ul> <li>Engagement of core staff in QI (clinical and non-clinical) includes:</li> <li>Demonstrated evidence that staff members are engaged and encouraged to use those skills to identify QI opportunities and develop solutions.</li> <li>A shared language regarding quality, which is evidenced in routine discussion.</li> <li>Description in the annual quality plan, and includes staff training and roles and responsibilities regarding staff involvement in QI activities and use in staff performance evaluation</li> <li>A formal process for recognizing staff performance internally and QI teams are provided</li> </ul>

Page 7 of 22

		opportunities to present successful projects to all staff and leadership.
Full systematic approach to quality management in place	5	<ul> <li>Engagement of core staff in QI (clinical and non-clinical) includes:</li> <li>Staff awareness of the importance of quality and continuous improvement, and their participation in identifying QI issues, developing strategies for improvement and implementing strategies.</li> <li>Regular and continuous QI education and training in QI methodology.</li> <li>Leadership who encourages all staff to make needed changes and improve systems for sustainable improvement including the necessary data to support decisions.</li> <li>Formal and informal discussions where teamwork is openly encouraged and leadership shapes teamwork behavior.</li> <li>Routine communication about new developments in QI, including promotion of QI projects both internally (e.g., quality conferences) and externally (e.g., related conferences).</li> <li>Opportunities for abstract development and submission to relevant professional conferences and authorship of related publications about development and implementation of institutional QM programs.</li> </ul>
Comments: We are	a soli	id 2 and are working towards implementing more staff engagement in the OI process. While the

**Comments:** We are a solid 2 and are working towards implementing more staff engagement in the QI process. While the CARE Team and clinicians have been engaged in some of the QI activities and issues, we are working on consistently involving other clinic staff. We believe that the addition of other staff such as nurses and/or MA's would increase buy in towards our quality efforts.

B.2. To what extent	is sta	ff satisfaction included as a component of the quality management program?
Each score r	equir	res completion of all items in that level and all lower levels (except any items in level 0)
Getting Started	0	□ There is no mechanism in place to assess and address staff satisfaction.
Planning and initiation 1	1	Staff satisfaction: $X \square$ Is assessed through informal discussion with some staff.
Beginning Implementation	2	Staff satisfaction: □ Is part of a formal process that includes at least one staff satisfaction survey.
Implementation	3	<ul> <li>Staff satisfaction:</li> <li>□ Is part of a formal process where information is utilized to determine opportunities for improvement.</li> <li>□ Survey results are reviewed with staff and areas for improvement identified.</li> </ul>
Progress toward systematic approach to quality	4	Staff satisfaction: □ Survey results are reviewed with staff, areas for improvement identified, and planning is underway/work has begun to utilize this information to improve work conditions within the program.
Full systematic approach to quality management in place	5	<ul> <li>Staff satisfaction:</li> <li>□ Is measured in multiple ways (surveys, performance reviews) and information is utilized to improve work conditions within the ability of the program.</li> <li>□ Survey results lead to improvement projects or activities through findings. Issues raised through staff feedback are prioritized in plans for improvement.</li> <li>□ Is characterized by staff directed QI project teams initiated based on data analysis, with updates regularly communicated to leadership and all staff members.</li> </ul>

Comments: Added to QM Calendar. We need a simple tool that is solution oriented and practical. (Clinic staff did a a survey, and Raquel Ruiz sent a copy to Robin.)

C. Measurement, Analysis and Use of Data to Improve Program Performance

GOAL: To assess how the HIV program uses data and information to identify opportunities for improvement, develops measures to evaluate the success of change initiatives, to align initiatives, and to monitor program status; and to ensure that accurate, timely data and information are available to stakeholders throughout the organization to drive effective decisions

The Measurement, Analysis and Use of Data section assesses how the program selects, gathers, analyzes and uses data to improve performance. This includes how leaders conduct performance reviews to ensure that actions are taken, when appropriate, to achieve program goals.

C.1. To what exten	t does	the HIV program routinely measure performance and use data for improvement?
Each score 1	requir	res completion of all items in that level and all lower levels (except any items in level 0)
Getting Started	0	□ <u>Performance measures have not been identified</u> .
Planning and		Performance measures:
initiation		□ Have been identified to evaluate some components of the program, but do not cover all
	1	significant aspects of service delivery.
		□ Are defined and used by personnel at some but not all units or sites.
		Performance data:
		□ Collection is planned pending initiation.
Beginning		Performance measures:
Implementation		□ Are externally defined and used by personnel at all applicable sites.
	2	Performance data:
	2	□ Validation, analysis and interpretation of results on measures are in early stages of
		development and use.
		□ Results are occasionally shared with staff and patients.
Implementation		Performance measures:
		X Are externally defined or required (e.g., HAB, HIVQUAL), with the intent to meet external
3		regulatory requirements and the needs of stakeholders, including patients.
		$X\square$ Are defined and consistently used by personnel at all applicable sites. (to some extent)
		Performance data:
	3	$X\square$ Are tracked, analyzed and reviewed with the frequency required to identify areas in need of
	5	improvement. A structured review process is used regularly by the leadership to identify and
		prioritize improvement needs and initiate action plans to ensure that goals are achieved.
		$X\square$ Are collected by staff with working knowledge of indicator definitions and their
		application.
		$X\square$ Results and associated measures are routinely shared with staff and their input is elicited to
		make improvements.
Progress toward		Performance measures:
systematic		□ Are externally defined or required (e.g., HAB, HIVQUAL) and tied to annual organizational
approach to		goals, with the intent to meet external regulatory requirements and the needs of stakeholders
quality	4	and patients, and goals of alignment with current evidence in the diagnosis and treatment of HIV.
		□ Reflect priorities of clinic staff and patients, in consideration of local issues.
		Performance data:
		Results and associated measures are frequently shared with staff to elicit their input and
		engage them in improvement processes aligned with organizational goals.
Full systematic		Performance measures:
approach to	_	Are selected using organizational annual goals, with the intent to meet external regulatory
quality	5	requirements as well as the needs of stakeholders and patients, and goal of alignment with
management in		current evidence in the diagnosis and treatment of HIV.
place		□ Reflect priorities of clinic staff and patients, in consideration of local issues.

	1	
		<ul> <li>Are defined for each program component and actively used to drive improvement activities.</li> <li>Are evaluated regularly to ensure that the program is able to respond effectively to internal and external changes quickly.</li> </ul>
		Performance data:
		□ Are visible or easily accessible to ensure data reporting transparency throughout the clinic. □ Are arrayed in formats that enable accurate interpretation, such as run charts and/or control charts.
		<ul> <li>Results and associated measures are systematically shared with all stakeholders, including staff, patients and boards to elicit their input and engage them in improvement processes aligned with organizational goals.</li> </ul>
Commontes Doufor	mono	e measures are shared with providers and to some extent CARE team. Need to expand to

<u>E. Consumer Invol</u> GOAL: This section management progra	n asse	<u>nt</u> sses the extent to which consumer involvement is formally integrated into the quality	
multiple ways inclu	ding s	ncompasses the diversity of individuals using HIV programmatic services and can be achieved olicitation of consumer perspectives through focus groups, key informant interviews and mal consumer advisory board that is actively engaged in improvement work; consumers as	l in

multiple ways including solicitation of consumer perspectives through focus groups, key informant interviews and satisfaction surveys; a formal consumer advisory board that is actively engaged in improvement work; consumers as members of program committees and boards; and conducting consumer needs assessments and including consumers in specific QI initiatives. Ideally, consumers have a venue to identify improvement concerns and are integrated into the process to find solutions and develop improvement strategies. Overall, consumers are considered valued members of the program, where consumer perspectives are solicited, information is used for performance improvement and feedback is provided to consumers.

E.1. To what extent are consumers effectively engaged and involved in the HIV quality management program?

### Each score requires completion of all items in that level and all lower levels (except any items in level 0)

**Getting Started** 0  $\square$  There is cractivities.

□ There is currently no process to involve consumers in HIV quality management program activities

	ction surveys were done and are in analysis process. We are in the process of integrating sumer- oriented CQI meetings.

### F. Quality Program Evaluation

GOAL: To assess how the program evaluates the extent to which it is meeting the identified program goals related to quality improvement planning, priorities and implementation.

Quality program evaluation can occur at any point during the cycle of quality activities, but should occur annually at a minimum. The process of evaluation should be linked closely to the quality plan goals: to assess what worked and what did not, to determine ongoing improvement needs and to facilitate planning for the upcoming year. The evaluation examines the methodology, infrastructure and processes, and assesses whether or not these led to expected improvements and desired outcomes. At a minimum, the evaluation should assess access to data to drive improvements, success of QI project teams; and effectiveness of quality structure. Where appropriate, external evaluations and assessments should be utilized in partnership with the internal evaluation. The evaluation is most effectively performed by program leadership and the program's quality committee, optimally with some degree of consumer involvement.

F.1. Is a process in place to evaluate the HIV program's infrastructure and activities, and processes and systems to ensure attainment of quality goals, objective and outcomes?

Each score requires completion of all items in that level and all lower levels (except any items in level 0)			
Getting Started	0	$\Box$ No formal process is established to evaluate the quality program.	
Planning and Initiation	1	Quality program evaluation:         □ To assess program processes and systems is exclusively external.	
Beginning Implementation 2	2	Quality program evaluation:           X□ Is part of a formal process and is integrated into annual quality management plan development	
Implementation	3	Quality program evaluation:         Occurs annually, conducted by the quality committee, and includes QM plan and workplan updates and revisions.         Involves annual (at minimum) revision of quality goals and objectives to reflect current improvement needs.         Results are used to plan for future quality efforts.         Includes a summary of improvements and performance measurement trends to document and assess the success of QI projects.         Results, noted above, are shared with consumers and other key stakeholders.	
Progress toward systematic approach to quality	4	Quality program evaluation:         Findings are integrated into the annual quality plan and used to develop and revise program priorities.         Is reviewed during quality committee meetings to assess progress toward planning goals and objectives.         Includes review of performance data, which is used to inform decisions about potential changes to measures.         Is used to determine new performance measures based on new priorities.         Includes analysis of QI interventions to inform changes in program policies and procedures to support sustainability.	
Full systematic approach to quality management in place	5	Quality program evaluation:       □         □ Findings are integrated into routine program activities as part of a systematic process for assessing quality activities, outcomes and progress toward goals. Data and information is provided regularly to the quality committee.         □ Is used by the quality committee to regularly assess the success of QI project work, successful interventions and other markers of improved care.         □ Includes data reflecting improvement initiatives, and is presented to ensure comprehensive analysis of all quality activities.	

		<ul> <li>Uses a detailed assessment process. The results of this assessment are utilized to revise and update the annual quality plan; adjust the HIV program priorities; and identify gaps in the program.</li> <li>Includes an analysis of progress towards goals and objectives and QI program successes and accomplishments.</li> <li>Describes performance measurement trends which are used to inform future quality efforts.</li> <li>Communicates evidence that QI efforts informed through this process resulted in</li> </ul>
		measureable improvement.

		res completion of all items in that level and all lower levels (except any items in level 0)
Getting Started	0	□ No clinical performance results are routinely reviewed or used to guide improvement activities.
Planning & Initiation	1	Data:         □ For some measures are routinely reviewed and used to guide improvement activities.         □ Trends for some measures are reported to determine improvement over time.
Beginning Implementation	2	Data:         □ Results for most measures are routinely reviewed and used to guide improvement activities.         □ Trends for most measures are reported and many show improving trends over time.
Implementation 3	3	<ul> <li>Data:</li> <li>X□ Results for all measures are routinely reviewed and used to guide improvement activities, including Viral Load Suppression and Retention in Care.</li> <li>X□ Trends for all measures are reported and many show improving trends over time.</li> <li>X□ Results are compared to a larger aggregate data set for at least 2 outcome measures: Viral Load suppression and Retention in care.</li> <li>X□ Comparison to larger aggregate data set is used to set programmatic targets.</li> </ul>
Progress toward systematic approach to quality	4	<ul> <li>Data:</li> <li>□ Comparison to larger aggregate data set are used to set programmatic targets and targets are met for at least 50% of measures.</li> <li>□ Results for Viral Load Suppression and Retention in Care scores are equal to or greater than the 75<sup>th</sup> percentile of comparative data set.</li> </ul>

Page 15 of 22

Full systematic approach to quality management in	5	<ul> <li>Data:</li> <li>Trends are reported for all measures and most show sustained improvement over time in areas of importance aligned with organizational goals.</li> <li>Comparison to larger aggregate data set are used to set programmatic targets and targets are</li> </ul>		
place		met for at least 75% of measures. □ Results for Viral Load Suppression and Retention in Care scores are above the 75 <sup>th</sup> percentile of comparative data set.		
Comments:				
C 2 Reduction in I	Disnaı	rities in HIV Care		
<ul> <li>G.2. Reduction in Disparities in HIV Care</li> <li>GOAL: To assure that all patients receive the same level of quality services and resulting health outcomes regardless of their exposure category, race/ethnicity, gender, age or economic status.</li> </ul>				
This section assesses the program's ability to assure that all patients, regardless of their exposure category, race/ethnicity, gender, age or economic status, receive the same level of quality care. In order to achieve equity in quality and outcomes for all patients, a system for consistent review of data stratified by these factors, and evidence of actions taken for any disparities identified would be needed.				
G.2. To what extent does the HIV program measure disparities in care and patient outcomes, and use performance data to improve care to eliminate or mitigate discernible disparities ?				
Each score requires completion of all items in that level and all lower levels (except any items in level 0)				
Getting Started 0	0	$X\square$ No clinical performance results are routinely reviewed or used to address disparities.		
Planning & Initiation 1	1	Performance measures/data: Are stratified for analysis of disparities by gender, age, SES, risk factor, geography, etc.		
Beginning Implementation	2	Performance measures/data: Are used to identify disparities Are used to plan improvement strategies		
Implementation	3	Performance measures/data:		
Progress toward systematic approach to quality	4	<ul> <li>Performance measures/data:</li> <li>□ Are used to develop and implement general and targeted improvement strategies based on data analysis</li> <li>□ Demonstrate some evidence of improvement of outcomes for identified disparities</li> </ul>		
Full systematic approach to quality management in place	5	Performance measures/data: Demonstrate sustained evidence of improvement of outcomes for identified disparities		
Comments: Other than comparing Santa Cruz to Watsonville (which have some differences mostly in race/ethnicity), we have not used performance data to measure disparities in care and patient outcomes. We are looking at a possible PDSA to look at this, with the outcome being viral load suppression. (Possibly Serena and Rachel to take the lead).				

Page 16 of 22

### **Summary of Results**

Comments By: \_\_\_\_\_Robin Stone\_\_\_\_\_ Date: \_\_2/20/19\_\_\_\_\_

### What are the major findings from the Organizational Assessment?

Please number and link all findings with key recommendations and suggestions. Major findings should address all components with a score below 3.

# A.1. To what extent does senior leadership create an environment that supports a focus on improving the quality of HIV care?

**Rating is 4.** Leaders are promoting patient-centered care and supporting our efforts to promote consumer involvement through the QM program

# A.2. To what extent does the HIV program have an effective quality committee to oversee, guide, assess, and improve the quality of HIV services?

**Rating is 3.** While we are a solid 3, we are working on integrating the elements in # 4. We are represented by multiple disciplines and are looking at adding a Nurse Case Manager to our QM Committee, who has already participated in our Retention to Care PDSA. We are also are in the process of adding a Clinic MA to our committee. We are also in discussion about implementing staff satisfaction surveys annually. We need to strengthen our communication with non- members. CARE Team staff meeting agendas include QM, but we need to improve the integration of QM with clinic staff. We are intending to post QM minutes and activities on the agency intranet, which could reach a broader spectrum of non- members. We intend to use our work plan to monitor our quality activities. We have begun to participate in the clinic QM program and have given them an overview of our RW Part C QM program. We are sending minutes to Senior management at the clinic and are needing to clarify what the expectation of providing progress reports to the organization-wide quality program is. Would posting activities, sending minutes to clinic leadership, and providing updates at clinic CQI meetings suffice?

# A.3. To what degree does the HIV program have a comprehensive quality plan that is actively utilized to oversee quality improvement activities?

**Rating is 2.** While we have implemented many of the components of the QI components that are stated in # 3, approval of our plan is still pending to date, and has not been routinely communicated to program staff. We intend to have the plan approved by 3/1/19, to e-mail it to key staff and stakeholders, and to post it on the intranet if that is available. Key components will be shared at CARE Team staff meeting as appropriate. We will also make an effort to ensure that clinic staff is kept more informed of and included in the QM plan.

# **B.1.** To what extent are physicians and staff routinely engaged in quality improvement activities and provided training to enhance knowledge, skills and methodology needed to fully implement QI work on an ongoing basis?

**Rating is 2.** We are a solid 2 and are working towards implementing more staff engagement in the QI process. While the CARE Team and clinicians have been engaged in some of the QI activities and issues, other clinic staff has not been involved, We believe that the addition of other staff such as nurses and/or MA's would increase buy in towards our quality efforts.

# **B.2.** To what extent is staff satisfaction included as a component of the quality management program?

Organizational Quality Assessment Tool

**Rating is 1.** Added to QM Calendar. We need a simple tool that is solution oriented and practical. (Clinic staff did a survey and Raquel Ruiz sent a copy to Robin.)

# C.1. To what extent does the HIV program routinely measure performance and use data for improvement?

**Rating is 3**. Performance measures are to be run quarterly and shared with providers, and to some extent CARE team. Need to expand to other staff.

# D.1. To what extent does the HIV program identify and conduct quality improvement initiatives using robust process improvement methodology to assure high levels of performance over long periods of time?

Rating is 3. Committee utilizes PDSA, committee analysis, and conversation.

# E.1. To what extent are consumers effectively engaged and involved in the HIV quality management program?

**Rating is 2.** Consumer satisfaction surveys were done by the CARE Team and are in analysis process. May be beneficial to integrate clinic staff into participating in future surveys. We are in the planning phase of integrating consumers into quarterly consumer- oriented CQI meetings. We have targeted our April, 2019 as the first date.

# F.1. Is a process in place to evaluate the HIV program's infrastructure and activities, and processes and systems to ensure attainment of quality goals, objective and outcomes?

**Rating is 2.** We are a solid 2 and have begun to implement # 3. Since many of the members of the QM Committee have changed, we are re-establishing ourselves, and intend to continue our processes to ensure attainment of quality goals, objectives and outcomes.

# G.1. To what extent does the HIV program monitor patient outcomes and utilize data to improve patient care?

**Rating is 3.** Our program uses HAB Performance Measures for comparisons. Some of the outcomes that we are low on have to do with the way data is entered, and we are working to correct that. Data is to be run quarterly and reviewed at the CQI meetings. Improvement projects are to be identified by such data.

### G.2. To what extent does the HIV program measure disparities in care and patient outcomes, and use performance data to improve care to eliminate or mitigate discernible disparities?

**Rating is 0.** Other than comparing Santa Cruz to Watsonville (which have some differences mostly in race/ethnicity), we have not used performance data to measure disparities in care and patient outcomes. We are looking at a possible PDSA to look at this, with the outcome being viral load suppression.

# What are the key recommendations and suggestions? What specific areas should be improved? What are specific improvement goals for the upcoming year?

Please include associated timeframe for each recommendation and improvement goal. Recommendations and areas in need of improvement should address all components with a score below 3.

### PRIORITIES/GOALS FOR THE YEAR

- 1. Improve data collection and utilize in program development-quarterly performance measure reports and additional reports as necessary
- 2. Clarify and update performance measures- ongoing
- **3.** Increase consumer participation-Consumer participation in QM meetings to occur quarterly, beginning 4/19.
- Initiate quality activities based on data outcomes such as PDSA's-PDSA to occur minimally twice a year, and to be driven by outcomes and consumer/stakeholder feedback
- 5. Perform a functional evaluation of the CQM program-annually (completing Feb 2019 Organizational Assessment tool)

### ADDITIONAL RECOMMENDATIONS

- 1. **Further integration of staff into QM activities**-ongoing; (Clinic MA added to the QM Committee)
- 2. Staff satisfaction survey-10/19
- 3. Implement measures to evaluate and address disparities in care and outcomestimeline to be determined

Please note any events or other information that may have impacted service delivery, positively or negatively, since the last organizational assessment:

Since the last organizational assessment, there have been changes and temporary gaps in staffing that impacted service delivery. The lead CQI physician resigned her position, and is no longer serving on the QM committee (although she does see HIV patients at our Watsonville HIV clinic). Our long-time data analyst that had been working on the committee was also transferred to another position around the same time as the lead CQI physician resigned. Although the data analyst was replaced, it has been a learning curve for the new analyst. The CARE Team/HIV Case Management supervisor retired from her position, and it took some time to replace her. The Part C Project Director and Manager for the CARE Team /HIV Case Management was on medical leave for about 4 months, then came back part time for a total duration of 2 years. All these factors impacted our QM program, and in many ways, it felt like we had to start from the beginning.

It has taken a while to get things up and running, but we have made progress. The retired supervisor has come back to help part time and has taken a lead role with QM efforts. Our Health Officer has been participating in our QM Committee. We have added a clinician to our committee. We also have added an epidemiologist who is also the HIV Surveillance Coordinator. We are hopeful that we will be able to stay on target with our QM Plan for this year and subsequent years as well.

### **Additional Questions**

1) Regarding your facility's use of an electronic health record (EHR) system,<sup>\*</sup> select one of the following:

\_\_X\_An EHR system for HIV Primary Care has been implemented. Please specify the EHR vendor: \_\_\_OCHIN/EPIC\_\_\_\_

\_\_\_\_We have committed to an EHR.

Feb, 2019

Organizational Quality Assessment Tool

Page 21 of 22

Please specify the EHR vendor:
--------------------------------

\_\_\_\_We are choosing between vendors. Please specify which vendors are being considered:

We are not investigating using an EHR vendor. \*Please note, CAREWare and Lab Tracker are not EHR systems.

2) Does your facility use CAREWare or another database/software program to manage and/or monitor HIV care?

CAREWare Different database or software program Please specify: \_ARIES, EPIC\_\_\_\_\_

3) Has your facility applied for certification as a Patient-Centered Medical Home?

NCQA Level 1 applied	
NCQA Level 2 applied	X
NCQA Level 3 applied	
Do not know level applied	
Have not applied	

Our facility has applied and achieved PCMH Recognition, as levels are no longer applicable.

4) If your facility has applied for certification as a Patient-Centered Medical Home, has your facility been approved?

NCQA Level 1 approved	
NCQA Level 2 approved	
NCQA Level 3 approved	
Do not know level approved	
Have not been approved	

Our facility has achieved PCMH Recognition, as levels are no longer applicable.
